6. LEW/ Submission/ Commissioning Provision EMA Registered LEW with approved technicians to carry out Electrical Audit and Integrity test on the electrical system for property at 2A Jalan Grisek in accordance with SS638 Work scope to: 1. Conduct visual inspection on non-compliance including checking of existing wiring, checking of re-wiring previously done by landlord and compliance with outdoor wiring as per SS638 2. Conduct Insulation test (Megger test) - Megger test checks integrity of the electrical wiring insulation. 3. Conduct Earth Loop Impedance test An earth loop impedance test is conducted to make sure that, if a fault occurs in an electrical circuit, the fault current will strong be enough to set off the circuit protection. If a fault current is left undetected, circuits can overheat and catch on fire. 3. Conduct RCD test - RCD testing induces various levels of leakage current into the electrical system in a safe manner; this allows the electrician to evaluate the overall level of when an RCD will 'trip' the circuit, and it also allows evaluation of the trip time (the time period it takes the RCD to activate). 4. Conduct polarity test - It is a test conducted on both the primary and secondary windings of a transformer and also to know the direction of the current. Report shall be provided pointing out extend of workscope for rectification required.	1	2,000.00	2,000.00
